This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. UNIV. OF CALIFORNIA

INTRODUCTION

This index is intended to answer the question whether a given volume or the current issue of a magazine or other serial is to be found in the city of Rochester, and if so, in what libraries it may be consulted.

It was pointed out in the first annual report of the Rochester Public Library that there are in the various book collections of the city files of many valuable periodicals. These contain a wealth of information for those engaged in research work, who need to consult the bound volumes of old standard magazines and the recent numbers of the many highly specialized publications in every department of knowledge.

Many indexes to these magazines have been compiled, notably Poole's Index, Reader's Guide, Magazine Subject Index, Index to Legal Periodicals, Dramatic Index, Industrial Arts Index, and Reader's Guide Supplement. From these indexes references to magazine articles may be easily obtained. But to find the magazines referred to is not so easy and investigators have lost much time in vain inquiries and visits to libraries.

One of the first tasks which the Public Library set for itself was to foster co-operation between the several libraries of the city to the end that needless duplication of effort and expense might be avoided and that the book resources of the city might be utilized to the fullest extent. The list of periodicals herewith submitted is a contribution to that end.

The plan for the list was launched under the auspices of the Rochester District Library Club. Little progress was made however until the Public Library assumed entire charge of the undertaking and employed a special assistant to do the work.

Each co-operating library was requested to prepare on cards the entries for its own periodicals. The replies thus received formed the basis of the list. This preliminary work was done under the supervision of Miss Leta E. Adams, then Head of the Catalog Department in the Public Library. The person who most carefully and conscientiously looked after the multitude of details connected with such a compilation was Miss Alice Harris Brown.

Grateful acknowledgment is made of help received from many sources. Frequent use was made of similar lists mentioned under the heading "List of References." Special mention is due for valuable assistance received from the Library of Congress and the New York

Public Library. Other libraries which helped in answering questions were:

Buffalo Public	Ontario, Dept. of Education
Catholic University	Philadelphia Free
General Theol. Seminary	Philadelphia Library Co.
Harvard University	Philadelphia Mercantile
N. Y. Academy of Medicine	Riggs Memorial
New York State	Syracuse Public
Newberry	Union Theological Seminary

Mr. Franklin H. Chase, Dr. Max Landsberg, and Mr. John A. Tennant also made contributions.

Considerable uncertainty attaches to a number of foreign publications. In cases where they had been regularly current previous to the outbreak of the European war they are still so marked, although they may not be coming at present or are appearing only at irregular intervals.

At first it was planned to list only the files in public and institutional libraries, but such valuable material was discovered in certain factories and business corporations that a number of them were included. The list contains approximately 3065 titles, and 1048 references.

Librarian

EXPLANATIONS

"A serial is a publication issued in successive parts, usually at regular intervals, and, as a rule, intended to be continued indefinitely." —A. L. A. Rules.

Serials include periodicals, newspapers, annuals, and the transactions, proceedings, etc., of societies and institutions.

In all entries, the latest form of a name or title appearing in the libraries' files is used.

Usually government documents and college catalogs are omitted.

A serial not published by a society or institution is entered under the first word, not an article, of its title.

A serial published by a society or institution but having a distinctive title is entered under the first word, not an article, of its title, with reference from the society or institution.

The proceedings, transactions, memoirs, etc., of a society or institution are entered under the name of the society or institution.

A newspaper is entered under the name of the city in which it is published.

A directory is entered under the name of the place which it indexes. (Only Rochester and Monroe County directories are included.)

An institution (establishment) is entered under the name of the place where it is situated.

Exceptions:

a) An institution having a distinctive name is entered under the first word, not an article, of its name.

b) A university or college institution (library, museum, observatory, etc.) or society is entered under the name of the university or college.

c) A national or state institution incorporating the name of the country or the state in its name is entered under the name of the country or the state.

d) An agricultural experiment station in the United States is entered under the name of the state where it is situated, with a reference from the institution with which it is connected.

A society is entered under the first word, not an article, of its corporate name.

Exceptions:

a) A state historical society is entered under the name of the state.

b) A learned society of Europe, other than English, with a name beginning with an adjective denoting royal privilege (Kaiserlich, Königlich, Reale, etc.) is entered under the word

following the adjective which is abbreviated and disregarded in the arrangement.

References have been made:

From earlier forms of a title to its latest form in the libraries' files, and from early names of a society or institution to its latest name.

From the name of a place to societies which have their headquarters there, and to those institutions which have not been entered under place.

Also, wherever else a reference would facilitate the use of the list.

ABBREVIATIONS AND SYMBOLS

Following the entry is the record of the libraries possessing the serial, with volume numbers and dates of their files. See list of Co-operating Libraries for meaning of the initials.

A dash — between volume numbers or dates signifies "from and including the former to and including the latter."

Parentheses ( ) enclosing volumes or dates signify that those volumes or dates are incomplete.

Brackets [ ] indicate that the information which they enclose has been supplied by the cataloguer.

A plus sign + indicates that the serial is currently received.

a) If it follows volume numbers and dates, it indicates that the file is complete from the last volume and date given.

b) If it is preceded by a semi-colon ; it indicates that the library possesses a file as shown by the volume numbers and dates, but that later and current issues are not preserved.

c) If no numbers precede the + it indicates that the serial is currently received but not preserved. In most libraries these are kept for a year or two.

Parallels || indicate that the serial ceased publication with the preceding date.

... show that a word or words have been omitted.

v. Volume, tome, band, etc.

pt. Part, fascicule, heft, etc.

no. Number, numéro, nummer, etc.

s., ser. Series, série, folge, etc.

n.s. New series, nouvelle série, neue folge, etc.
